

Prohibited Articles

Certain electronic devices or their features are prohibited or controlled at SNL because they present a risk of compromising classified or sensitive information. Prohibited or controlled devices include the following:

- Any item prohibited by federal, state, or local law (e.g., radar detectors are prohibited on KAFB)
- Computers and PDAs
- Recording devices, including audio and visual (e.g. memory sticks, removable computer media, microphones and cameras are prohibited)
- Recordable computer media (e.g. it is acceptable to bring "burned" CDs, as long as the CDs are not re-writeable)
- Wireless telephones and transmitters, including satellite and infrared devices
- Portable devices with modems or other data exchange ports.

Personally owned electronic devices are typically not allowed; however, simple calculators, hearing aids, vehicle remote-entry key fobs and garage door openers are not typically prohibited or controlled.
